Performance
Surpassing Performance

Superior Reagents, Quality Controls and Calibrators
High quality original reagents, calibrators and controls offer a complete system for our users. Cyanide free eagents allow laboratories to meet necessary environmental regulations. Complete traceability system

High Quality Design
New internal structural design separates electronic components from the fluidic system, decreasing interference while at the same time allowing for easier maintenance.

BC-3600
Auto Hematology Analyzer
Pleasant Experience in Hematology Testing

BC-3600
Auto Hematology Analyzer
Labs today are facing a multitude of challenges including limited laboratory budgets, increasing requirements for high quality as well as reliable products, a shortage of experienced clinicians and so on. We understand the specific needs of end users, and use them as the foundation for our new solution BC-3600. Complete with an intuitive operation system, convenient data communication interface, excellent performance, BC-3600 is a system solution for satellite labs and clinics.

- CBC +3 -DIFF, 16 parameters +3 histograms
- Throughput: 60 samples per hour

Intuitive operation system with TFT touch screen

- Enhanced performance by proven technologies

Closed Tube Sampling

- He,000 results storage with histograms
- High quality CC , calibrators and reagents

## 

User-friendly

The well organized software interface eases your operation and gives you easy control of sample results, patient records and report customizations. Shortcut menu simplifes your work process and improvese efficiency. Distinguishable areas display WBC, RBC and PLT results clearly. Automatic mainte nance programs can be executed by doubleclicking the function keys while operational errors can be removed with
single clicks. single clicks.

User-friendly

Intelligence and Efficiency
Efficient ZAP and flush method removes clog completely. For Closed Tube model, 3 types of tube adaptors are provided to satisfy individual laboratory needs. With the on-line reminder function, users can conveniently monitor the reagent residual volumes through the software.
