# T1

Healthcare providers today face many challenges in their mission to deliver quality patient care. One of the most significant is workflow complexity, out of which arises the need to work smarter. Now more than ever, clinically-focused monitoring solutions that assist in efficiently delivering high-quality patient-centric care are essential.

## Transforming patient care

As a comprehensive, 3-in-1 monitoring solution, T1 is designed to adapt to the monitoring needs across the hospital enterprise. Serving as parameter module, transport monitor, and bedside monitor in one, the T1 provides seamless, gap-free monitoring throughout the healthcare facility, where and when it's needed. It's that simple.

expanding capabilities | adapting to needs | enhancing workflow

# One Monitor | Multiple Solutions

# 1

## Versatile Bedside Monitor

Practical yet sophisticated with an uncluttered view of patient information, T1 paired with the 19" display ideally meets the bedside monitoring needs of multiple hospital departments.

# 2

## Compact Transport Monitor

Simply slide the T1 from the Passport module bay and it automatically converts to a wireless transport monitor immediately connecting with your wireless network, maintaining continuity of patient data with the central monitoring station/EMR.

# 3

## Robust Multi-Parameter Module

Upon completing your patient's transport, insert the T1 into the integrated module bay of Passport 12m/17m and you're up and running with no gaps in data. The full-featured T1 multi-parameter module provides robust monitoring capabilities to suit acuity levels throughout the hospital.
